# TEARDROP LIGHT

Acoustical Ceiling Light

Frasch Teardrop is a family of drum light fixtures and ceiling baffle shaped and inspired by the human eye. The tapered design incorporates a unique manufacturing process that allows for curved PET panels to form acoustical performing hollow cavities while also providing the structural support for the built-in round LED disc light fixture. The lighting options allow for up lit, down lit, and backlit through a cut-in patterned design. Teardrop fixtures can also clustered together to form various shapes and patterns with flexible two point hanging allowing for ease and flexibility of the final creative installation.
